Ordering and Comparing Numbers - Primary Resources

To compare and order fractions we must first convert all integers, mixed numbers (mixed fractions) and fractions into values that we can compare. We do this by first converting all terms into fractions, finding the least common denominator (LCD), then rewriting each term as an equivalent fraction with the LCD.

Ordering Fractions Calculator

Go Math 4th Grade Lesson 1.3 Compare and Order Numbers

So we can put $\frac{1}{3}$ is least, and we cross that off. Next, it's either 21 out of 30, or 25. 21 is less, and that represented $\frac{7}{10}$, so we can say $\frac{7}{10}$, 'cause $\frac{21}{30}$ equals $\frac{7}{10}$, and finally that leaves us with $\frac{25}{30}$, which is equivalent to $\frac{5}{6}$. So from least to greatest, our fractions are $\frac{1}{3}$, $\frac{7}{10}$, and then $\frac{5}{6}$.

Ordering fractions (video) | Fractions | Khan Academy

Below are six versions of our grade 4 fractions worksheet on ordering 3 fractions (proper and improper) and mixed numbers. Students must compare the 3 numbers and write then in order using the "greater than" and "less than" symbols. Fractions will typically have
