Verified Purchase: A Natural History of the Senses is a wild romp through smell, taste, hearing, touch and sight. It is also a guided tour of how humans experience the world. At times the writing has a rare beauty to the point of being poetic while at other times it is exotic, intimate and revealing.

A Natural History of the Senses: Ackerman, Diane ...

Natural history is a domain of inquiry involving organisms, including animals, fungi, and plants, in their natural environment, leaning more towards observational than experimental methods of study. A person who studies natural history is called a naturalist or natural historian. Natural history encompasses scientific research but is not limited to it. It involves the systematic study of any category of natural objects or organisms. So while it dates from studies in the ancient Greco-Roman world
