Introduction from Dr. Colvard

During these consultations, many people with cataracts were dismayed to learn that surgery is their only option for restoring sight. The eye's cloudy natural lens must be removed and replaced with an artificial one, known as an intraocular lens or IOL.. Even when I stopped doing cataract surgery and after more modern and safer procedures were adopted, I would rarely — if ever — seriously ...

Vision after cataract surgery, a cataract surgeon's experience

Cataract surgery successfully restores vision in the majority of people who have the procedure. People who've had cataract surgery may develop a secondary cataract. The medical term for this common complication is known as posterior capsule opacification (PCO). This happens when the back of the lens capsule — the part of the lens that wasn't ...
