The Airco Dip-Pak was a good machine. The Airco Distributor I worked for sold truckloads of them. But today, if an internal part fails, Arc-Products may charge you an arm and a leg for it. As far as consumables, the machine you are showing the picture of has a Tweco gun on it, so parts are readily available anywhere.

Still feeds wire, just no arc, on any of the 8 settings of the highest power range. Any clues what this could likely be? I'm quite new to welding, and have never had one opened up until about 15 minutes ago.
