Macroeconomics Case study 1 Problems in measuring GDP ...

Macroeconomics is the science which studies economics in general and its various processes and rules. Macroeconomics as a separate branch of economics appeared not long ago and is considered to be quite a young study. Nevertheless, the first ideas about the global economics sounded already in the 15th century. The key problems which are studied by macroeconomics are: economical development and its factors; unemployment; the general level of prices; circulation of the finance; national budget ...
