For night photography I strongly recommend to use a tripod and play with long exposure. Sydney Opera building looks great at night. #5. Details are also interesting. When talking about architecture photography people tend to think of wide-angle shots and trying to capture the entire building or as much of it as possible.

## **Architectural Photography (I): Composition Tips**

When photographing old architecture, a straightforward and simple composition usually works best, showing the natural beauty and elegance of the building. It usually helps to include some of the surrounding scenery to give context to the architecture and make it feel less cramped. A simple composition gives a stately feel to older buildings.

Lenses in architectural photography allow you to capture structures in dynamic ways. Some, such as prime lenses will give you very sharp images, and less distortion. Yet, to photograph a closer scene means you will need to move closer to the subject. Zoom lenses allow you to capture a wider or closer frame without moving.
