## **GUI for Autosys. - Unix**

AutoSys is an Automated Job scheduler used for creating a job, apart from that, it is also used for controlling and monitoring it. In this context, a job can be referred as a set of batch program or script program, which can be executed for reporting and handling of the un-managed task. The command or job can be programmed using some predefined keywords and attributes, for running AutoSys; you need to have a Windows or UNIX / LINUX machine.
