Students learn to use engineering and surveying data to draw plans for civil engineering projects. Specific areas of study include plan and profile drawings, cross-sections and legal descriptions.

Civil Drafting Course and Class Descriptions

Civil engineering and drainage analysis. A civil engineering team has to consider every aspect of the building process. In addition to the integrity of the structure itself, engineers also need to think about a piece of land's ability to manage water flow in the event of a major storm or flooding. Even ancient builders realized this.
