The RS1 is a CAD designed sim-racing cockpit built from wood, but with the quality and design features of commercial rigs. The RS1 is a simplified version of our original Cheetah series of racing simulators, and is designed to be easy to build with common woodworking tools.

Build your own racing cockpit

As a British ex-pat living in Brunei, I'm now building version 3 of my home-build/DIY Boeing 737 Sim. With limited resources, postal services, and a very restricted budget. Learning from the previous simulator builds, I'm going for more realism and full scale. Hoping to inspire and allow others to create their sim build cheaply as possible.

In an unmodded Creative world, there is only one useable small ship cockpit. It is helpful to place the cockpit first and build the ship around it. Some small ships have a backup cockpit, which is useful if you have a passenger, but we'll leave that out. You can enter and exit the cockpit by targeting the front glass and pressing T.
