Overview. Drawing on work in linguistics, language acquisition, and computer science, Adele E. Goldberg proposes that grammatical constructions play a central role in the relation between the form and meaning of simple sentences. She demonstrates that the syntactic patterns associated with simple sentences are imbued with meaning—that the constructions themselves carry meaning independently of the words in a sentence.

Constructions: A construction grammar approach to argument ...

Construction grammar is a sociobiological family of theories within the field of cognitive and evolutionary linguistics. These posit that human language consists of constructions, or learned pairings of linguistic forms with meanings. Constructions correspond to replicators or memes in memetics and other cultural replicator theories. The term 'construction' replaces a number of concepts from linguistics including words, morphemes, fixed expressions and idioms, and abstract grammatical rules such
