(PDF) Simon Benninga - Financial Modeling 4th edition ...

1b. IRR refers to the rate at which the present value of cash flows would be equal to cash outflows which states an investor must get such rate of return after selecting the project.. It is the rate which makes the present value of cash flows equal to cash outlay and at such rate NPV would be zero. In the given case, it has required to compute the IRR of the project given the information in ...
