Economic change is a shift in the structure of an economic system. This results in changes to societies, cultures and everyday life on a global or national basis. Economic change caused by technology, politics and progress is a regular feature of history. The following are illustrative examples of economic change.

15 Examples of Economic Change - Simplicable

In economics, structural change is a shift or change in the basic ways a market or economy functions or operates. Such change can be caused by such factors as economic development, global shifts in capital and labor, changes in resource availability due to war or natural disaster or discovery or depletion of natural resources, or a change in political system. For example, a subsistence economy may be transformed into a manufacturing economy, or a regulated mixed economy may be liberalized. A cur

Structural change - Wikipedia

As the economic structure changed, so did occupational rents and political power. This in turn created and enforced new institutions that were consistent with the new distribution of occupational rents and economic structure. It is this equilibrium dynamic that creates structural rigidities.
